

Webinar on 21st century careers after Class 12

- Ronaq Karnwal

25th September, 2020

First and foremost, a heartfelt gratitude to our school authorities for providing us with such an outstanding session from Career Launcher presented by Mr. Manuj Mittal.

The webinar was very interesting and provided us with a vision pertaining to career options after graduating from high school by choosing the right subject. The session was very enriching and Mr. Manuj Mittal is a great career counsellor. He explained the topic and gave an overview of the various subjects students can choose in a very interesting and accurate manner.

The session started at 3:45 pm sharp and concluded at 5:10 p.m. without the slightest hint of any network problems and other disturbances. However, students were given time to join till 4:00 p.m. Around 25 students attended the session under the supervision of our respected teacher Mrs. Aparna Nauriyal.

Mr. Manuj Mittal covered some crucial topics within the stipulated time of one hour. Some of the salient features of the webinar are listed below:

- How to systematically achieve everyday goals
- Career options and prospects of the subject pupils aspire to choose for further education. The webinar widened our horizons regarding various subjects and streams.
- Amidst the pandemic situation one should carry an optimistic approach towards academics and upcoming examinations.
- Time management in digital era.

This session was, indeed, beneficial to the students and on behalf of my fellow students, I would request our school authorities to provide us with more such sessions with great facilitators like Mr. Manuj Mittal so that students are enlightened about topics like education in foreign countries, scholarships for Ivy League schools, etc.

It was an enjoyable learning experience for all of us.
