I.T	<ul style="list-style-type: none"> L- 2 Hardware and Software L-6 Word 2013 	<ul style="list-style-type: none"> L- 8 Logo L- 9 More on Logo

Dear Parents,

Warm greetings!

The winter school holidays are upon us again and unless you are travelling or holidaying away, then there is the usual predicament of entertaining the kids, managing to still get work/house/ errands done.

So how can we have stress free, productive and enjoyable holidays?

Here are some tips to make this period a fruitful experience for your kids.

- Set screen time rules on day one and stick to them**

We all know it's far too easy to be busy and getting on and the kids are quiet because they are on their devices, so not giving you any bother. But actually it's not doing them any good in both the long and short term. So set a scheduled time especially when they are on mobiles and other technological devices which should not exceed a limit if you want them to get better at free play.

- Use holiday clubs**

Let children enjoy by joining such clubs which gets them out, active and socializing. They meet new children and also try out a new skill or activity. They also get to meet elders and other helpers which goes a long way for their overall development.

- Involve the kids in jobs**

Getting kids involved in jobs like cleaning, sorting out clothes, organizing books, writing thank you notes etc. will go a long way to enhance the confidence of your child.

- Set them a challenge**

Give your kids a challenge. This could be a project like in art and craft, making cards, decorating their room, writing a story or a poem....something they can do a little bit every day.

- Appreciate the time**

Do make the most of quality time with them. Let them interact and spend time with their grandparents or visit an old age home.

- Follow a healthy schedule**

Let them know the value of eating only healthy food, exercises, adequate amount of water, yoga and meditation, playing outdoor games and most importantly staying happy and cool.

➤ **Let your child develop his/her handwriting skills by practicing a page of hindi/english writing every alternate day.**

➤ **Practice makes one perfect. Help your child to enhance his/her mathematical skills and concepts by working on solving problems, story sums, memorizing tables and applying math in real life.**

(Send the day wise work done in notebooks of the above for class verification after the school reopens.)

Make their each day fun filled. Let them enjoy and come back rejuvenated!
