FROM THE PRINCIPAL'S DESK

As someone once rightly said, "While we try to teach our children all about life, our children teach us what life is all about".

And this past Term has truly been a lesson for all of us, adults – educators, parents, coaches et al – as to how resilient children are and given a conducive environment, they can work wonders even in the most challenging of times.

The Pandemic cautions notwithstanding, we tried to provide a 'near normal' environment to our students and they lived upto and beyond our expectations, providing us uncountable moments of joy. A school assembly, which one would otherwise take for granted became a moment for celebration, so did the return of the pitter patter of the tiny feet of the Pre-Primary students, some of whom had spent their entire conscious lives in lockdowns. Physical school was an absolutely novel experience for them and an optimistic indicator for the rest of us.

While on the academic front, adequate rigours were put into place to cope with the learning gaps of the online period, on the sports and co-curricular front too, we more than made up for lost time.

Inter-house and inter school matches resumed alongwith the regular games and activity lessons. The mammoth Socials conducted for the new and the old class XII also generated much excitement. Four other, rather significant annual events that we were able to accomplish are – the Pre Primary Graduation Ceremony, Deepotsav, Investiture and the glorious, The Asian Challenge Inter-school English Debate.

All festivals that were marked during the Term too were celebrated with aplomb and

during the Term too were celebrated with aplomb and gaiety.

Yet another effort of the extremely gratifying conduct of vaccination different age groups, made the most of. second doses for the too was done most done in collaboration Department and Centre – so a big thank

school, that was was the repeated camps in school, for which the students Follow up of the residential students diligently. This was with the State's Health Krishna Medical you to them.

MISSION STATEMENT FROM HEAD BOY & HEAD GIRL

**Yuvaan Narayan
Head Boy**

My dream for the Asian school is for it to become the most renowned school not just in Dehradun but in all of India.

The school has definitely grown after the Pandemic in its internal administration and thinking. The new found liberty given to the students has helped them to become more mature and worthy of responsibility.

The dream for achieving such great heights is a very lofty one and would need time, effort and innovative means of management. The aim isn't just to be the most prestigious institution but to be worthy of the fame and honour. This can only be achieved when the students are brought up in a manner which promotes leadership, maturity, humility and a strong moral code.

Gradually the responsibility is being taken up by Prefects and the school's functioning is being handled more and more by them and less teacher supervision is therefore needed. This gives me hope to see my dreams fulfilled in the near future. We would also need to eradicate the conservative mindsets from the system, wherever it still persists and encourage a new liberal and open approach to understand the students better and guide this school to great success.

**Sharvangi Bajpai
Head Girl**

I have a dream that school isn't anymore simply about getting good grades and completing assignments, but a source of knowledge and a path to authenticity both in manner and mind. For education is a gift that no one could ever take away from you.

The purpose of education is not only imparting bookish knowledge but to ensure the holistic development of a child encompassing academics, co-curricular, physical education and life skill learning.

It is of utmost importance that we strive to provide a curriculum that focuses on students as well as their social group.

We need to make a place for ourselves in our incessant pursuit of excellence and create a learning environment conducive to education our generation.

I do believe that we all have a gift within us and no single lens can ever be fixed for visualising such myriad layers of the human psyche. We need a multidimensional and holistic approach to address and build on our imagination.

The voyage ahead is uncharted and the waters unfathomable, and it is our duty to direct ourselves to the streams ahead in the ideals of our esteemed institution: Higher! Stronger! Brighter!

EDUCATIONAL SYSTEM – FOR MENTAL HAPPINESS

In recent times we are encountering increasing numbers of mental disorders and drugs abuse in school going children. A recent report of WHO says that 20% of children globally experience mental disorders like depression and anxiety.

Now research has shown that schools can help avoid such disorders and help children lead happier lives – only if such outcomes are valued.

Schools tend to value academic achievements of students over their mental health and wellbeing – especially in India. Teachers face a lot of pressure to ensure that their students get highest marks. This also contributes to poor mental health in teachers, and many develop burnouts.

Education system has the capability to overcome this growing problem. This can be seen by considering the education system of the happiest countries in the world. All the five Nordic countries - Denmark, Sweden, Norway, Finland and Iceland – which are among the top ten happiest countries – give more emphasis on social-emotional learning. Their education system provides children the skill and knowledge to recognize and emotions effectively. They value judgements of teachers more than any exams and also do not rank schools which lead to less rivalry, stress and anxiety.

Perhaps it is the time to look into the education system of these countries and incorporate some ideas to our system for a more happier outcome.

6. A NEEDLE

KEEP UP THE HOPE

Sometimes In pursuit of a dream
There will come some moments
When you may feel that dream is lost
Hard work gone down the drain
That everything has slipped from hand .
Wipe the tears ,Persevere ,begin anew
And renew your faith
In the person that you are .
Believe that you have the ability
To overcome any obstacles that come in way
To remove any boulder that block your path to success
And when your dreams of success come true
Its then that you'll find what a stronger person you've
become .

THE EARTH NEEDS YOU

The Earth needs you,
To change your ways
Month by month,
And day by day.

The changes are easy,
Just look and you'll see.
The differences that can be made,
By you and by me.

Single-used plastic
Lasts almost forever.
It may be cheap,
But it's not very clever.

It can end up in oceans,
Rivers or seas.
The wind sometimes carries it
And tangles it in trees.

If people used less,
The better place it would be.
The future's in our hands,
Cut-down and you'll see.

When people drop it onto the
Ground,
It is not where stays,
It travels around.
